**AIR CONDITIONING & HEATING  
 HOME COMFORT SPECIALIST**

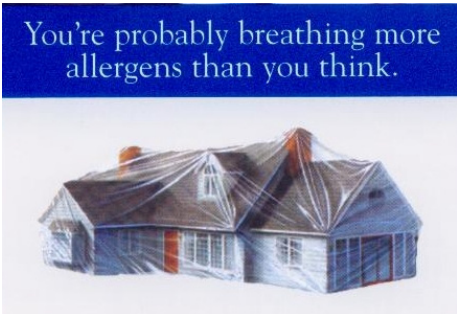

**Volume 1, Issue 1  
 December 1, 2006**

All of us at **Chill-Rite** A/C would like to thank all of our friends and customers for your support and loyalty over the last 25 years. We are proud to announce that a lot of improvements are being made, which will help educate and improve our service to you. As you can see we have started a Newsletter which we will be packed with information on new products, technology, money saving ideas, and coupons for you. We would appreciate any input and ideas that you may have for this Newsletter. We want this to be an interactive forum between both Chill-Rite and you the heart and soul of the business. A new era has arrived. Energy costs are rising at an incredible rate, homes are becoming more and more air tight, which have caused many problems with indoor air quality. As your **Home Comfort Specialist** we will work together with you and other trades to find solutions to your problems and give you the quality and peace of mind you deserve.

TYLER, Texas (September 28, 2006)

Your home is a comfortable haven where you spend your time laughing, playing and relaxing. Yet even with a regular cleaning routine, trillions of airborne particles such as pet dander, dirt, bacteria and mold spores can find their way into your house each day. To help get rid of potentially harmful things that you can and can't see, American Standard Heating & Air Conditioning offers *Comfort is in the Air*, a free consumer booklet with 10 tips for keeping indoor air clean and comfortable so your family can breathe easier.

**SAVE MONEY WITH A PROGRAMMABLE THERMOSTAT**

Save about 3% of your heating costs for every degree you lower your thermostat during the winter? Or you can cut cooling costs up to 6% for every degree you raise your thermostat in the summer? Set your programmable thermostat to save energy by turning down your thermostat while sleeping or when you're not at home, and to come on before you get up in the morning.
